Beautiful. Radically Simple. Open Source.

SAY HELLO TO EMOJI ID™

Sending and receiving digital currencies is anxiety-inducing. One wrong character and your money is gone forever. To solve this problem, addresses on the Tari network are strings of Emoji. The Tari community calls this revolutionary address form factor Emoji ID. With Emoji ID, the first three and last three emojis are easier to identify and recall than random characters, and each Emoji ID includes a checksum to ensure the address isn't malformed. Emoji ID helps further the Tari community's goal of making Tari easy to use for everyone.

PRIVACY HAS NEVER LOOKED THIS GOOD

Every aspect of Aurora is meticulously designed to be intuitive and easy to use. Beautiful design doesn't have to take away from serious privacy. Tari is a MimbleWimble implementation written in Rust with meaningful privacy benefits. Default privacy isn't only a mission-critical requirement for Tari, we believe it's a basic human right.

A REFERENCE DESIGN FOR TARI

Aurora is completely open-source via BSD 3-Clause. We hope that developers will be able to use the Aurora codebase to build their own Tari wallets and applications in the future. Want to contribute to Aurora? Get started here.

A FRONT-ROW SEAT TO WATCH TARI COME TO LIFE

The mission for Tari is to build the most useful decentralized platform that empowers anyone to create digitally scarce things people love. It will take time for the Tari community to achieve this audacious goal. Installing and using Aurora is the best way to watch the Tari vision come to life over time.

SPEND tXTR ON REAL EXCLUSIVE STUFF

Once you've downloaded the wallet, check out The TTL Store to spend your "hard-earned" tXTR* on exclusive, one-of-a-kind, stuff produced by the team at Tari Labs. Enjoy!

*Note that tXTR has no monetary value and cannot be exchanged for cash, cash equivalent, or other tokens or cryptocurrencies.

What's New

[Version History](#)

In this release, we changed the way how we inform our users about the backup process. Now, pop-ups will appear on the screen when the user reaches a certain token amount.

Version 0.19.0

We also enabled the cloud backup options. From now you can again backup and restore your wallet from the cloud.

Tweaks

Solid improvements keep coming. Keep up the hard work all.

murdockmadrox, 05/13/2020

Slick and easy to use

UX on wallet setup is very aesthetic, I was impressed by the set up process. Love the look and feel of this wallet. Emoji ID is a fun feature too.

Johnodon, 04/30/2020

Can't send

Trying to buy the usb condom from the Tari store, but previous test send still hasn't confirmed after 12 hours. I can't send any funds until it clears. Pretty awful in terms [more](#)

App Privacy

[See Details](#)
